

I am a truck driver that travels into large cities and need traffic updates on what is going on within 15 min and local radio stations do not give updates when they should they rather talk about how there weekend or night went if you ask me i do not care i just want to know 24 hrs 7 days a week every 15-30 mins on what the traffic is doing so iI can reroute myself and the cb radio with high amounts of hijackings of trctor trailers and shootings and terrioism the cb is only 20% correctI think broadcaters should look at the big picture because the truck drivers depend on this service it makes are jobs easier we have the info we need without listening to somebody problems of last night or the weekend over the radio i listen to drivers cry over the cb every day and i do not want to hear it on the am/fm i am just tired of it
